

Mr. Genesis

Super Absorbent Polymer

1 Apply 2 Absorb 3 Transport

Mr. Genesis is a Super Absorbent Polymer (SAP) Crystal, a substance designed to absorb high volumes of liquid into itself. This allows the liquid, and any contaminants housed within, to be removed/transported in a much easier and affordable way.

Mr. Genesis is unlike other solidification media, such as sawdust, Portland cement, kitty litter, Dri-Rite or kiln dust, in that it chemically bonds with water. It will hold it under pressure and only add minimal mass.

Mr. Genesis will safely encapsulate radioactive waste, blood, vomit, and contaminated water. When used in conjunction with Mr. Surface, our microbial product, it will also absorb and encapsulate all types of fuel and oil.

For more information on Mr. Genesis, its many different uses, or our state of the art systems, please contact us.

FREQUENTLY ASKED QUESTIONS:

Is Mr. Genesis hazardous?

Studies have shown that Mr. Genesis is non-toxic and non-hazardous. In fact, Mr. Genesis decomposes as carbon, nitrogen, and water.

How much Mr. Genesis do I need for my situation?

The amount of Mr. Genesis needed to absorb unwanted liquid is determined by the volume and type of liquid present. There is no absolute equation for how much of our product you need for any given situation. However, it should be noted that Mr. Genesis can absorb up to 400 times its volume in liquid.

CLEANUP IS SIMPLE

APPLY Mr. Genesis to the liquid that needs to be cleaned up.

WITH MR. GENESIS

After the liquid is fully absorbed you can safely and easily dispose of the waste into a disposal container.
